The ARC is a great resource to know about on campus. They are “dedicated to helping students achieve their full academic potential through individual academic counseling, study skills coaching, tutoring, providing services for students with disabilities, and early intervention outreach.”

How much time should I spend studying?

According to HowToStudy.com the rule of thumb is: “two hours studying per week for each credit hour you take. So, for each class you should spend about six to eight hours studying. Full-time students should anticipate spending about 30 hours each week studying.” For more great tips on studying and time management visit their website.

Please note that events and notices throughout the month will be posted as announcements and banners on myGCC.
