Connecting to the Library VPN (Windows 8)

Step-by-step

Step 1: Swipe from the right side of your screen to open the panel. Select Settings.

Step 2: You will then be provided with 6 options at the bottom of the panel. Choose the one on the top left (shown below). This is your network.

Step 3: Now your panel will provide you with the list of available connections. Select the Library VPN option, then click Connect.

Once your computer connects, close out of your browser. When you open a new one, you can access all library resources off-campus, including eBooks and article databases!

NOTE: If you reach Step 3 and you do not see the Library VPN on your list of networks, you can add it using the instructions linked here or by contacting the TLC (724.458.2255; helpdesk@gcc.edu).
